

teric

GeoTeric 2D

Enabling best-in-class 2D noise attenuation

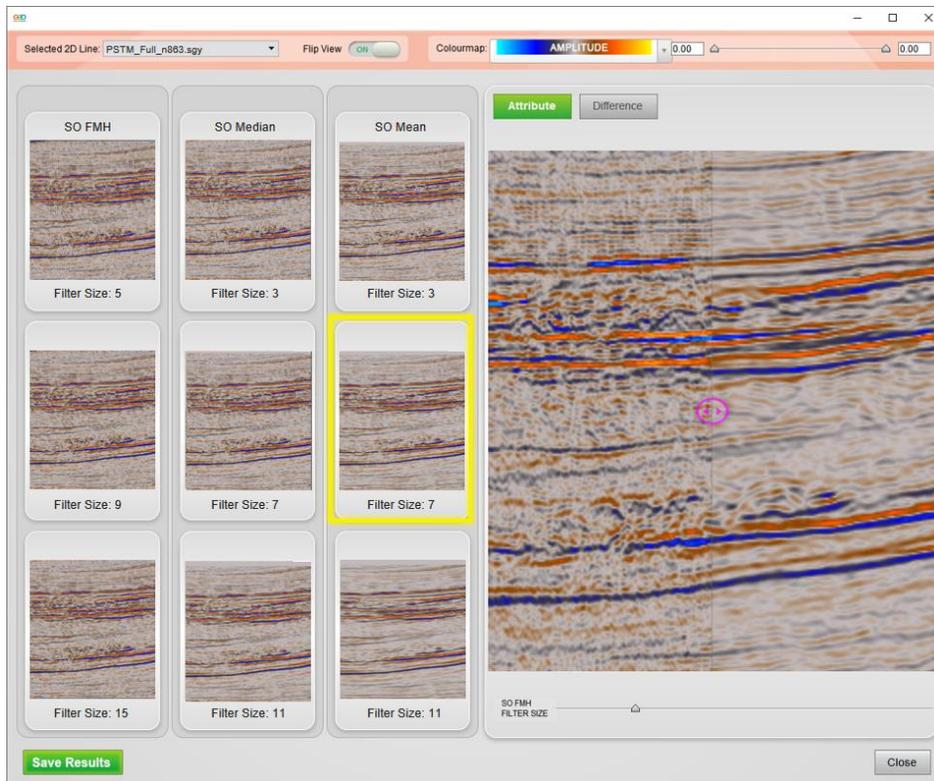

The best of GeoTeric 3D now in 2D

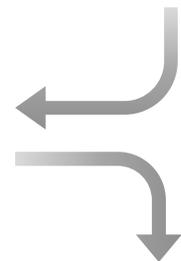

- Independently licenced / standalone application
- No need for full 3D application
- Process multiple lines simultaneously
- Reveal significant information efficiently and accurately

GeoTeric 2D Noise Expression Features

- Noise attenuation filters optimised for 2D
- Full access to previews & interactive QC
- Expression Tool interface
- Preserves floating point resolution
- Direct SEGY access

2D SEGY Loader

Our customers say...

"By using GeoTeric Data Conditioning I was able to map my horizon much faster and more reliably than before"
ADNOC
