

## GeoTerac 11<sup>th</sup> Annual UK Technology Forum

**Tuesday 23<sup>rd</sup> May 2017**

Geological Society  
Burlington House  
Piccadilly, Mayfair  
London W1J 0BD

**9:15am – 4:30pm**

Followed by drinks & networking

**Tim Rady**

### Premier Oil

"Using GeoTerac's Horizon Packs to unravel the complex interplay between stacked, deep-water canyon systems in the Ceará Basin, Equatorial Brazil".

**Rich Hiney**

### Echo Geo

"Chasing elusive source rocks using 3D to 2D High Definition Frequency Decomposition".

**Judit Meszaros**

### Rockhopper Exploration

"Carbonate platform case study, Italy - integration of qualitative GeoTerac frequency decomposition and geophysical interpretation into reservoir modelling".

## The Next Step in Seismic Interpretation

If you want to see "the next big thing" in seismic interpretation, I strongly encourage you come to the GeoTerac Technology Forum 2017. As in previous years, the centre piece of the Technology Forum will be the very strong programme of invited papers providing a unique opportunity to debate and discuss with industry colleagues the different approaches to tackling a broad range of technical challenges.

*Jonathan Henderson, CEO GeoTerac*
